

I am an OTR truck driver, and I listen to XM Satellite Radio almost exclusively since I purchased it in January. I pay for this service so that I can have continuous radio coverage, and I really benefit from the ability to find out the weather in or near the cities that I am driving towards. I respectfully request that you reject the NAB's petition 04-160, so that XM radio may continue to provide the quality programming that I have been paying for and enjoying since January.

Thank you for your consideration,
Donna Burns
